+1-469-943-6778

Profile: Masters student with 3.5 yrs of software dev experience and a passion for innovating technical solutions

RELEVANT SKILLS

Python, SQL, JAVA, Django, Redis, API, PyTorch, PySpark, Kubernetes, Docker, OpenCV, Linux, Networking

EXPERIENCE

- Sony (Playstation)** San Francisco, CA
Software Development Intern | **java, spring, kafka, concurrency, grpc, no-sql, cassandra** May 2022 - Present
 - Working on a backend service which publishes hints to the online PS5 users dynamically based on the game context
 - Porting monolith news publisher service into micro services using gRPC based custom built framework
 - Building grafana analytical dashboards to visualize service performance charts derived from over 100M active users
- Brave Orbit** (Remote) Capetown, South Africa
Full Stack Developer | **python, django, flutter, pytest, redis, celery, gcp, k8s** Jan 2020 - Aug 2021
 - Developed a cross-platform app using BLoC pattern, implemented database, network and state management layers
 - Engineered HIPAA compliant scalable async push notification service for medication reminder application
 - Developed a task scheduler for clinical surveys that delivers email, SMS alerts and gathers response on a recurring basis
 - Developed a ERP system, custom features such as multi-product substitutions, combo-products are developed
 - Kubernetes CI/CD workflows were setup to automatically test, build and deploy backend services on cloud
 - Developed automated testing pipelines and improved test coverage for both frontend and backend services
- Accenture** Bangalore, India
Big Data Developer | **python, redshift, pyspark, pandas, aws, distributed-systems** Sep 2018 - Dec 2019
 - Time series analysis was performed on drug assay data to identify raw materials that effect the drug quality
 - Designed ETL data validation pipeline using micro service architecture; Manual testing resources were cut by 70%
 - PL/SQL procedures were developed to generate parent child hierarchies using temporal drug life cycle data
- Visakhapatnam Port Trust** Visakhapatnam, India
Computer Vision Intern | **vision, opencv, video processing, scikit-learn** May 2017 - July 2017
 - Extracted frames from surveillance cameras; merged them based on SIFT keypoints and RANSAC; trained a SVM to detect cargo type and estimate lease area; developed a motion detector model to identify suspicious movements

PROJECTS

- Recommender system using graph neural networks (gnn, deep-learning):** Developed an inductive matrix completion model using user-item node embeddings pretrained on movie reviews; 1-hop sub graphs are used to forecast ratings
- Computer vision based vehicle damage detector api (vision, rest-api, django, pytorch):** Trained an instance segmentation model to detect damages; assigned a health score based on relative area of damage and deployed as an api
- Unordered image stitching and deghosting (vision, image matching):** Estimated approximate overlap area by minimum variance technique on binarized images; stitched images based on binary tree model; removed deghosting from the overlap areas by selecting regions based on minimum local gradients
- Open-source contributions (nlp, open-source):** Core contributor to HuggingFace Datasets official repository
- Information extraction as seq2seq task (nlp, transformer, text2text):** Transformed labelled structured data into text; finetuned T5 model to generate text and extracted entities using REGEX
- Abstractive text summarization of tabular data (nlp, transformer):** Flattened tables into sequence of words, preserved structure using key:value format; Explored various text2text models to generate summary of news articles
- Deep learning based serverless rest api (serverless, rest-api, cloud-run, ci/cd):** Created synthetic face mask dataset and developed automated pipeline to build, test and deploy trained model in a docker container to google cloud run
- Reinforcement learning based crypto trading bot (time-series):** Designed a continuous action space OpenAI gym environment to handle trading data; LSTM with CNN was used as function approximator to actor critic algorithms
- Custom car controller app (full-stack, mobile-app, fastapi, webrtc):** Assembled the car with Jetson Nano; Cross-platform mobile app and controller service was developed to control the bot over network

EDUCATION

- University at Buffalo [3.95/4.0 GPA]** Buffalo, NY
Master of Science in Computer Science (AI/ML Specialization) Sep 2021 - Present
Courses: Data Structure & Algorithms, Computer Vision, NLP, Deep Learning, Big Data Systems, Reinforcement Learning
Research: Working at A2IL lab on projects related to NLP and Computer Vision, advised by Prof. David Doermann
- National Institute of Technology, Durgapur [3.3/4.0 GPA]** West Bengal, India
Bachelor of Technology in Computer Science and Engineering July 2014 - May 2018
Courses: Operating Systems, Computer Architecture, Networking, Database Management Systems, Compilers, Digital Image Processing
Thesis: Gender Classification using CNN advised by Dr. Dakshina Ranjan Kisku

PUBLICATIONS

- Time series analysis of civil unrest using Graph Neural Networks @ COLING 2022 (In Review):**
