vkudari@buffalo.edu +1-(469)-943-6778

EDUCATION

• State University of New York at Buffalo

Master of Science in Computer Science

Buffalo, NY

Sep. 2021 - Present

• National Institute of Technology, Durgapur

Bachelor of Technology in Computer Science and Engineering

West Bengal, India July 2014 – May 2018

Relevant Courses

Data Structures & Algorithms, Machine Learning, Reinforcement Learning, Computer Vision & Image Processing

SKILLS

• Languages: Python, SQL, Bash, Dart, JavaScript, Java

• Libraries: PyTorch, Django, PySpark, Pandas, NumPy, OpenCV, Matplotlib, Scikit, SQLAlchemy, Flask, Flutter, FastAI

• Tools: Docker, Compose, Kubernetes, PostgreSQL, Redis, Sentry

• Cloud: GCP, Heroku, AWS

EXPERIENCE

• Brave Orbit

Capetown, South Africa

Full Stack Developer

Jan. 2020 - Aug. 2021

- Re-Built a healthcare app into a cross-platform mobile application using Flutter. Set up BLoC, database and network layers
- o Designed & developed HIPAA compliant scalable push notification service leveraging Cloud Tasks & Firebase Messaging
- o Medication info and interactions API that supports caching was built on top of the NIH and MPR APIs
- o Developed a clinical surveying platform that sends out email and SMS alerts to patients and collects feedback periodically
- o Built a ERP system using Django, custom features such as multi-product substitutions, combo-products are developed
- o Kubernetes CI/CD workflows were setup on GitLab to test, build and deploy API's on cloud
- o NGINX reverse proxy server with SSL was setup on Docker to forward the traffic to services based on custom conditions

• Accenture

Bangalore, India

 $Advanced\ Application\ Engineering\ Analyst$

Sep. 2018 - Dec. 2019

- $\circ \ \operatorname{PL/SQL} \ \operatorname{procedures} \ \operatorname{were} \ \operatorname{used} \ \operatorname{to} \ \operatorname{generate} \ \operatorname{drug} \ \operatorname{material} \ \operatorname{hierarchies} \ \operatorname{from} \ \operatorname{huge} \ \operatorname{volume} \ \operatorname{of} \ \operatorname{drug} \ \operatorname{life} \ \operatorname{cycle} \ \operatorname{data} \ \operatorname{using} \ \operatorname{Redshift}$
- Performed trend analysis on drug potency data using PySpark on a EMR cluster to forecast potential raw materials affecting
 the drug quality. Several statistical measures are performed and colour coded control charts are visualised on spotfire
- Designed and developed automated data validation ETL pipeline leveraging microservice architecture to validate data across a wide range of data sources that resulted in 70% effort reduction and 75% cost saving on infrastructure

• Vishakapatnam Port Trust

Software Intern

Visakhapatnam, India May 2017 - July 2017

 Created datasets and trained machine learning models to identify cargo type and estimated size of lease area using computer vision techniques

Relevant Projects

• Maze Solver — Reinforcement Learning

- o Designed a custom 2D grid world; Implemented/applied RL algorithms like Q-Learning, Monte Carlo and Deep Q-Network
- Car Dent Detection Computer Vision, Deep Learning
 - o Performed instance segmentation based on Mask-R-CNN architecture to segment dents; Trained using COCO dataset

• DeepJet Autonomous Car — Computer Vision, Deep Reinforcement Learning

 code

- o Assembled the car with Jetson Nano; Cross-platform mobile app was build using Flutter to control the bot remotly
- o Implemented WebSockets to exchange sensor data with the controller; Applying RL/DL algorithms to make it autonomous

• Mask Detection REST API — Deep Learning, Backend

code

• Built a server-less deep-learning API service using Django REST Framework to classify images

Thesis

• Gender Classification Using CNN under Dr. Dakshina Ranjan Kisku

• Implemented Gil Levi and Tal Hassner's deep neural network architecture in PyTorch, tweaked the network layout, and evaluated various second-order optimisation techniques
