vkudari@buffalo.edu +1-(469)-943-6778

EDUCATION

• State University of New York at Buffalo

Master of Science in Computer Science

Buffalo, NY

Sep. 2021 – Present

• National Institute of Technology, Durgapur

Bachelor of Technology in Computer Science and Engineering

West Bengal, India July 2014 - May 2018

Relevant Courses

Data Structures & Algorithms, Machine Learning, Reinforcement Learning, Computer Vision & Image Processing

SKILLS

• Languages: Python, SQL, Bash, Dart, JavaScript, Java, HTML, CSS

• Libraries: PyTorch, Django, PySpark, Pandas, NumPy, OpenCV, Matplotlib, Scikit, SQLAlchemy, Flask, Flutter, FastAI

• Tools: Docker, Compose, Kubernetes, PostgreSQL, Redis, Sentry, Git

• Cloud: GCP, Heroku, AWS

Experience

• Brave Orbit
Full Stack Developer

Capetown, South Africa

Jan. 2020 - Aug. 2021

- \circ Re-Built a healthcare app into a cross-platform mobile application using Flutter, improved performace by 40%
- o Designed & developed HIPAA compliant scalable push notification service leveraging Cloud Tasks & Firebase Messaging
- o Medication reminder/interactions service was built using Django; NIH and MPR APIs are used to fetch interactions
- o Developed a clinical surveying platform that sends out email and SMS alerts to patients and collects feedback periodically
- Built a ERP system, custom features such as multi-product substitutions, combo-products are developed
- o Kubernetes CI/CD workflows were setup on GitLab to test, build and deploy API's on cloud
- Lead a few projects and mentored junior developers; Custom ERP system project assisted a supermarket chain in managing
 5X growth during the COVID-19 pandemic

• Accenture

Bangalore, India

Sep. 2018 - Dec. 2019

 $Advanced\ Application\ Engineering\ Analyst$

- Redshift PL/SQL procedures were used to generate drug material hierarchies from huge volumes of drug life cycle data
 Performed trend analysis on drug potency data using PySpark on a EMR cluster to forecast potential raw materials affecting
- the drug quality. Several statistical measures are performed and colour coded control charts are visualised on spotfire

 Designed and developed automated data validation ETL pipeline leveraging microservice architecture to validate data across a wide range of data sources that resulted in 70 effort reduction and 75% cost saving on infrastructure
- Vishakapatnam Port Trust

Visakhapatnam, India

Software Intern

May 2017 - July 2017

 Created dataset and trained SVM with gaussian kernal to identify cargo type; estimated size of lease area using computer vision techniques

Relevant Projects

• Maze Solver — Reinforcement Learning

 code

- $\circ \ \ Designed\ a\ custom\ 2D\ grid\ world; Implemented/applied\ RL\ algorithms\ like\ Q-Learning,\ Monte\ Carlo\ and\ Deep\ Q-Network$
- Car Health Score Computer Vision, Deep Learning

 \mathbf{live}

o Trained segmentation model to detect damage and calculate health score; Deployed model as a REST API in GCP

• DeepJet Autonomous Car — Deep/Reinforcement Learning, App Dev, Backend

 code

- Assembled the car with Jetson Nano; Cross-platform mobile app was build using Flutter to control the bot remotely
- o Implemented WebSockets to exchange sensor data with the controller; Applying RL/DL algorithms to make it autonomous

Mask Detection REST API — Deep Learning, Backend

 code

 Annotate mask dataset and fine tune ResNet model; Expose trained model as API and package using microservice architecture

THESIS

• Gender Classification Using CNN under Dr. Dakshina Ranjan Kisku

• Implemented Gil Levi and Tal Hassner's deep neural network architecture in PyTorch, tweaked the network layout, and evaluated various second-order optimisation techniques
