vkudari@buffalo.edu +1-(469)-943-6778

EDUCATION

State University of New York at Buffalo

Master of Science in Computer Science

Buffalo, NY

Sep. 2021 - Present

National Institute of Technology, Durgapur

Bachelor of Technology in Computer Science and Engineering

West Bengal, India July 2014 - May 2018

Relevant Courses

Data Structures & Algorithms, Machine Learning, Reinforcement Learning, Computer Vision & Image Processing

SKILLS

• Languages: Python, SQL, Bash, Dart, JavaScript, Java, HTML, CSS

PyTorch, Django, PySpark, Pandas, NumPy, OpenCV, Matplotlib, Scikit, SQLAlchemy, Flask, Flutter, FastAI • Libraries:

Tools: Docker, Compose, Kubernetes, PostgreSQL, Redis, Sentry, Git

Cloud: GCP, Heroku, AWS

EXPERIENCE

• Brave Orbit

Capetown, South Africa

Jan. 2020 - Aug. 2021

Full Stack Developer • Re-Built a healthcare app into a cross-platform mobile application using Flutter. Set up BLoC, database and network layers

- o Designed & developed HIPAA compliant scalable push notification service leveraging Cloud Tasks & Firebase Messaging
- Medication reminder/interactions service was built using Django; NIH and MPR APIs are used to fetch interactions
- o Developed a clinical surveying platform that sends out email and SMS alerts to patients and collects feedback periodically
- o Built a ERP system using Django, custom features such as multi-product substitutions, combo-products are developed
- Kubernetes CI/CD workflows were setup on GitLab to test, build and deploy API's on cloud
- o NGINX reverse proxy server with SSL was setup on Docker to forward the traffic to services based on custom conditions

• Accenture

Bangalore, India

Advanced Application Engineering Analyst

Sep. 2018 - Dec. 2019

- o PL/SQL procedures were used to generate drug material hierarchies from huge volumes of drug life cycle data using Redshift
- Performed trend analysis on drug potency data using PySpark on a EMR cluster to forecast potential raw materials affecting the drug quality. Several statistical measures are performed and colour coded control charts are visualised on spotfire
- Designed and developed automated data validation ETL pipeline leveraging microservice architecture to validate data across a wide range of data sources that resulted in 70% effort reduction and 75% cost saving on infrastructure

• Vishakapatnam Port Trust

Visakhapatnam, India

May 2017 - July 2017

• Created dataset and trained SVM with gaussian kernal to identify cargo type; estimated size of lease area using computer vision techniques

Relevant Projects

Software Intern

• Smart Broker — Deep/Reinforcement Learning, Computer Vision

code

- o Designed custom environment for crypto trading, training the networks on visual technical indicators like Candelstick, RSI
- Used LSTM/Transformers as function approximators and trained the agent using Actor Critic algorithms to optimise net gains

• Car Health Score — Computer Vision, Deep Learning

live

o Trained segmentation model to detect damage and calculate health score; Deployed model as a REST API in GCP

• DeepJet Autonomous Car — Deep/Reinforcement Learning, App Dev, Backend

code

• Assembled the car with Jetson Nano; Cross-platform mobile app was build using Flutter to control the bot remotely

• Implemented WebSockets to exchange sensor data with the controller; Applying RL/DL algorithms to make it autonomous

Mask Detection REST API — Deep Learning, Backend

code

o Annotate mask dataset and fine tune ResNet model; Expose trained model as API and package using microservice architecture

Thesis

• Gender Classification Using CNN under Dr. Dakshina Ranjan Kisku

o Implemented Gil Levi and Tal Hassner's deep neural network architecture in PyTorch, tweaked the network layout, and evaluated various second-order optimisation techniques
