vkudari@buffalo.edu +1-(469)-943-6778

EDUCATION

 State University of New York at Buffalo [3.89/4] Master of Science in Computer Science

Buffalo, NY Sep. 2021 - July. 2022

• National Institute of Technology, Durgapur [7.46/10] Bachelor of Technology in Computer Science and Engineering

West Bengal, India July 2014 - May 2018

Relevant Courses

Data Structures & Algorithms, Machine Learning, Reinforcement Learning, Computer Vision & Image Processing

SKILLS

• Languages: Python, SQL, Bash, Dart, JavaScript, C, C++, Java, HTML, CSS

• Libraries: PyTorch, Django, PySpark, Pandas, NumPy, OpenCV, Matplotlib, Scikit, SQLAlchemy, Flask, Flutter, FastAI

Tools: Docker, Compose, Kubernetes, PostgreSQL, Redis, Sentry, Git

Cloud: GCP, Heroku, AWS

EXPERIENCE

 Brave Orbit Capetown, South Africa Full Stack Developer Jan. 2020 - Aug. 2021

- Re-Built a healthcare app into a cross-platform mobile application using Flutter, improved performance by 40%
- o Designed & developed HIPAA compliant scalable push notification service leveraging Cloud Tasks & Firebase Messaging
- o Medication reminder/interactions service was built using Django; NIH and MPR APIs are used to fetch interactions
- Developed a clinical surveying platform that sends out email and SMS alerts to patients and collects feedback periodically
- o Built a ERP system using Django, custom features such as multi-product substitutions, combo-products are developed
- Kubernetes CI/CD workflows were setup on GitLab to automatically test, build and deploy backend services on cloud
- o Oversaw a couple projects and served as a mentor to junior developers. A custom ERP system project that I led helped a supermarket sustain 5X surge during the COVID-19 epidemic

Bangalore, India • Accenture Advanced Application Engineering Analyst Sep. 2018 - Dec. 2019

- Redshift PL/SQL procedures were used to generate drug material hierarchies from huge volumes of drug life cycle data
- o Performed trend analysis on drug potency data using PySpark on a EMR cluster to forecast potential raw materials affecting the drug quality. Several statistical measures are performed and color coded control charts are visualized on spotfire
- Designed and developed automated data validation ETL pipeline leveraging microservice architecture to validate data across a wide range of data sources that resulted in 70 effort reduction and 75% cost saving on infrastructure

• Vishakapatnam Port Trust

Software Intern

Visakhapatnam, India May 2017 - July 2017

• Created dataset and trained SVM with gaussian kernel to identify cargo type; estimated size of lease area using computer vision techniques

Relevant Projects

• Smart Broker — Deep/Reinforcement Learning, Computer Vision

- o Designed custom OpenAI gym environment for crypto trading, trained on visual technical indicators like RSI, MACD
- Applied LSTM chained with CNN as function approximators to Actor Critic algorithms; 10% returns were achieved

• Vehicle Health Inspector — Computer Vision, Deep Learning

link

o Trained segmentation model to detect damage and calculate health score; Deployed model as a REST API on GCP

• DeepJet Autonomous Car — Deep/Reinforcement Learning, App Dev, Backend

link

- Assembled the car with Jetson Nano; Cross-platform mobile app was build using Flutter to control the bot remotely
- Implemented WebSockets to exchange sensor data with the controller; Applying RL/DL algorithms to make it autonomous

• HuggingFace Datasets — NLP

o Contributed couple of datasets to HuggingFace repository, was a core contributed during the open source sprint

Thesis

• Gender Classification Using CNN under Dr. Dakshina Ranjan Kisku

o Implemented Gil Levi and Tal Hassner's deep neural network architecture in PyTorch, tweaked the network layout, and evaluated various second-order optimisation techniques
